Profilo

I'm an Italian student with a passion for computer science, creator of Rocking Square.

Born and raised in Naples, I now live in Salerno and I'm attending the Computer Science course at the University of Salerno.

I am determined, motivated, always ready to learn and live new experiences.

Esperienza

ROCKING SQUARE

In 2017 I developed and published Rocking Square, a small arcade game result of months of experiments through which I learned JavaScript.

Rocking Square is available online and on Play Store; from 2017 to 2018 it was also available on the Apple App Store, collecting around 5k downloads.

At the end of 2018 Rocking Square was available on the Blur platform (http://theblurapp.com/) which searches and shares arcade games developed in JavaScript.

SENDTOKODI

In 2018 I published the SendToKodi app for Android platform, driven by personal needs.

SendToKodi is actually an add-on for the famous Kodi that allows you to receive video streams to be played through the youtube-dl software. The add-on developer has published the client app for iOS, but not the Android app.

I then developed the small client app for Android and published it.

Istruzione

Liceo Renato Cartesio, Villaricca, Napoli – Diploma di Liceo Scientifico tradizionale, 2018

Università degli Studi di Salerno – Degree course in Computer Science (ongoing)

Competenze

The first year of University allowed me to acquire good knowledge of C.

Basic knowledge of JavaScript, CSS and HTML.

Excellent knowledge of the English language.
